

# **Our Sustainability Pledge**

Organisers of Scottish + Radiotherapy Physics 2023 recognise the importance of taking care of the environment and the environmental impact of hosting a conference. We commit to running our conference with a reduced environmental impact by working closely with our venues and suppliers to put in place environmental-friendly policies and best practices wherever possible.

To achieve this, we put the following initiatives in place to reduce our carbon footprint every stop of the way and contribute towards a safe and healthy environment.

Scottish + Radiotherapy Physics 2023 supports the <u>Sustainable Policy of the conference venue</u>, <u>Malmaison</u> <u>Dundee</u>.

## Organiser

#### **Pre-Congress**

- We used conference calls during the planning stage, reducing our carbon footprint by significantly removing travel for each committee member and organisers.
- We aim to significantly reduce the amount of printed material at every stage of our event by using technology. When printed material is unavoidable, we will use recycled paper.
- We used media and electronic methods for registration and confirmation, conference programme, event promotion, general and delegate communication including e-newsletters and emails.
- We selected a conference venue which supports sustainable practice, has a good recycling policy and a robust waste management policy.
- We have promoted active travel links.
- Venue selected for the conference is within the city centre and close to travel links and a wide range of accommodation
- We selected local suppliers to avoid long distance transport of goods and people.

### During the event

- Where possible, we will use digital signage in an effort to reduce single-use signage options.
- Name badge inserts provided will be made from recycled paper.
- We will be asking all delegates to return the badge holders provided for re-use.
- We will not provide delegate bags and will encourage delegates to bring their own.
- To minimise the environmental impact, we work with our conference venue to select fresh, locally or regionally sourced, seasonal food for the catering and order carefully to avoid food waste.
- If takeaway cups are provided they will be compostable.

# **Delegates and visitors**

We encouraged our delegates and visitors to make sustainable choices where possible to help reduce their carbon footprint.

# Travel

- Analyse the carbon footprint associated with your travel to and from Dundee by using this <u>calculator</u>. Offset the carbon footprint by compensating unavoidable emissions through acknowledged projects, for example <u>The UN Carbon Offset Platform</u>.
- Get active out and about in Dundee city. A compact city bursting with places of interest, history, and things to see, it is so easy to get around. <u>Dundee's active travel routes</u> in and around the city have been developed over the last few years with a key objective to encourage travel through walking, cycling and public transport, and deploy sustainable alternatives to decarbonise transport.
- We fully encourage the use of public transport, car share and walking as much as possible. When using a taxi, you may wish to consider sharing it with one of your fellow delegates

## Hotel

- Select a hotel that supports sustainability activities where possible.
- Consider selecting a hotel in the vicinity of the conference venue so you can walk to the venue or use a bike.
- Only use the air conditioning if it is really necessary.
- Turn off the lights and TV when leaving the room.
- Select the type and amount of food during meals sensibly in order to avoid food waste.

## **During the Conference**

- Consider bringing your own reusable water bottle and refilling it.
- Only pick up printed marketing and information material that you are really interested in and that you will use.
- Help us increase our recycling rate by placing all waste and recyclables into the appropriate waste recycling bins.
